

ModulKar is a handtruck made from high-strength stairclimber components. It is similar to the LiftKar but does not have a motor. The modular design allows for almost all of its components to be changed, which makes it suitable for a wide range of transportation needs. The maximum load capacity of the ModulKar is 300 kg.

The patented tube cross-section with a double-center web allows bolts to be placed right through it, and the groove on the inside adds extra strength. The wheel mountings are heavy-duty, and the connecting axle is only 8 cm above the ground, making it easy to tilt.

Only one tool is required to assemble or disassemble the ModulKar because the same TORX bolts are used throughout. The folding toe plate is held firmly in place with a nylon washer and a spring washer, preventing it from rattling. The wheels are mounted on industrial-class ball bearings for smooth operation.

Changing the wheels is easy thanks to the bolted two-piece rim and are done Formula 1 style by using just one bolt. Puncture-proof tires can also be ordered as an alternative.

the perfect solution for any situation

SUPERIOR-QUALITY
MODULAR DESIGN

Quick and easy wheel change.

JUST ONE BOLT!

MODULAR HANDTRUCK

FOR LOADS UP TO 300 KG

ADVANTAGES

- ✓ Extremely strong – up to 300 kg or 7 water bottles*
- ✓ Patented profile cross-section, extremely stable

- ✓ Extremely strong wheel brackets
- ✓ Connecting axle with support strut for rigidity
- ✓ Innovative rattle-free toe plate mounting
- ✓ Foldable toe plate (including fixation set)*
- ✓ Two-piece wheel – mounted on ball bearings
- ✓ New ergonomic design

* depending on the model

BASIC

The **ModulKar BASIC** redefines efficiency in the transport of loads. With a load capacity of 300 kg, it adapts to your industry needs seamlessly, ensuring safe and timely deliveries.

BOXER

The **ModulKar BOXER** is perfect for transport on long, flat surfaces. With its ability to effortlessly handle loads up to 300 kg, this handtruck excels in industries like beverages, postal services, furniture, and construction. Its ergonomic design not only exceeds quality expectations but also significantly reduces spinal strain.

BOXER PISTOL

The **ModulKar BOXER PISTOL** is perfect for many different transport situations. Equipped with pistol grips and angular stair gliders; and also with a load capacity of up to 300 kg, the **ModulKar BOXER PISTOL** is the ideal companion for industries such as retail, warehousing, event logistics and many more.

AQUA

The newest addition to our innovative product line, specifically designed to streamline water deliveries. This robust handtruck can carry up to 7 water bottles, catering to the high demands of water delivery services.

AQUA PISTOL

More than just functional, the **ModulKar AQUA PISTOL** stands for reliability and efficiency. Designed for daily use, it ensures professionals can perform their water deliveries without interruptions.
